

figures by the Examiner, new formal drawings will be filed incorporating the new Figures 5, 6, and 7.

In the Claims

The claims of the application have been amended herein as indicated in the following marked up copies of the claims:

Claim 1 (Amended). A form with integrated card having a primary film layer, a secondary layer, and a breakaway layer disposed between at least parts of the primary film layer and the secondary layer, the improvement comprising:

a base paper layer having top and bottom surfaces and a periphery;

a primary film layer having top and bottom surfaces and a periphery;

a breakaway layer coated on the top of the primary film layer and within the periphery of the primary film layer;

an adhesive layer wherein the base paper layer bottom surface within the periphery of the base paper layer is adhesively secured to the breakaway layer;

at least one die cut through the top and bottom surfaces within the periphery of the [form] base paper layer, through the adhesive layer, and through the breakaway layer;

the die cut base paper layer, adhesive layer, and breakaway layer comprising an information card; and

wherein the breakaway layer has a great affinity for the adhesive layer than the top surface of the primary film layer such that when the information card is removed from the form, the breakaway layer stays adhered to the bottom surface of the adhesive layer, said breakaway layer having release levels with respect to the primary film layer that vary in a predetermined pattern.

Claim 2 (Amended). A form with integrated card comprising:

a primary film layer having top and bottom surfaces and a periphery;

a breakaway layer directly and removably bonded to the primary film layer;

a secondary film layer having top and bottom surfaces and a periphery adhesively bonded to the breakaway layer;

a base paper layer having top and bottom surfaces and a periphery adhesively bonded to the secondary film layer;

at least one die cut through the top and bottom surfaces within the periphery of the [form] base paper layer, through the top and bottom surfaces within the periphery of the secondary film layer, and through the breakaway layer;

an information card consisting of the die cut base paper layer, secondary film layer, and the breakaway layer [comprising an information card]; and

wherein the breakaway layer is removably bonded to the primary film layer and permanently bonded to the secondary film layer such that when the information card is removed from the form, the breakaway layer stays adhered to the bottom surface of the secondary film layer, said breakaway layer [have] having release levels with respect to the primary film layer that vary in a predetermined pattern.

Remarks

In the Office Action of Paper No. 9, the earlier made restriction requirement between claims 1 through 15 and claims 16 through 23 of the Application was recalled. Claims 1 through 15 of the Application have previously been elected for examination and the election of claims 1 through 15 is affirmed.

The drawings of the application were objected to for failing to show every feature of the invention specified in the claims. More specifically, the subject matter of claims 9, 10, and 11 was considered to be absent from the drawing figures of the Application.

Submitted herewith are proposed new drawing Figures 5, 6, and 7 which disclose the subject matter of claims 9, 10, and 11. It is respectfully submitted that these proposed new drawing figures disclose subject matter set forth in detail in the written specification and
